## GLASS CURTAIN

The ability to open our frameless system without turning arm or some other external aid, has long been the impossible dream to others. KGA has already find the solution to this problem. With our unique opening system, glass shutters can be opened without the ugly and primitive turning aid and that can only done by twisting our professional handle and not turning it.

## luxury glass curtain

Glass Curtains are a revolutionary solution for those looking to temporarily secure balconies. Stunning and elegant in design, frameless Glass Curtains can be used throughout your home, office, retail establishment or shop front. Enjoy the flexibility of opening or closing up your space, while maintaining an open and spacious feel at all time. Turn an otherwise dusty or noisy balcony into a peaceful, clean and usable space. With Glass Curtains, young children and pets can go onto the balcony without fear of falling out. Use Glass Curtains to provide temporary protection from noise, dust, haze, rain and pests. Easily retract Glass Curtains when you want to let the outdoors in again. Glass curtain have been designed to withstand a wide variety of weather conditions. Our luxury profile has been tested for water and wind and meets the standards in other big countries. The mm thick tempered glass panels are customized and tempered in a very good quality to meet the high standard qualities.

New Generation BALCONY GLAZING SYSTEMS

## 8 REASONS FOR KGA

### Hidden water drainage

The hidden water drainage on the carrying profile is a chic and efficient KGA feature that enables the system to release the water formed by the steam on the panels. The rail based profile which is integrated to the system, works as water drainage system at the interior-bottom part at the same time works as duct on the outer-upper part. So the system receives the least amount of water. The amount of water that possibly would enter will be collected in water discharge unit and drained by discharge holes.

### Unstoppable Movement

KGA uses 38 mm diameter 8 special engineering rubber covered rust-free wheels, 4 of them placed on the upper part of the panel and 4 on the bottom part of the panel. You cannot stop KGA movement. All the glass panels move, open and close comfortably with the minimum noise and minimum friction .

### Smart cover

Smart covers of the system contribute to a perfect isolation level as well as perfectly efficient system junctions.

### Stainless steel components

As all the curtain products are, KGA series bearings and component parts are also under the anti-rust warranty.

### Safety lock system options

You can choose among the variations of lock system since it is a SlideMaster feature to design your safety need. lock system since it is a SlideMaster feature to design your safety need.

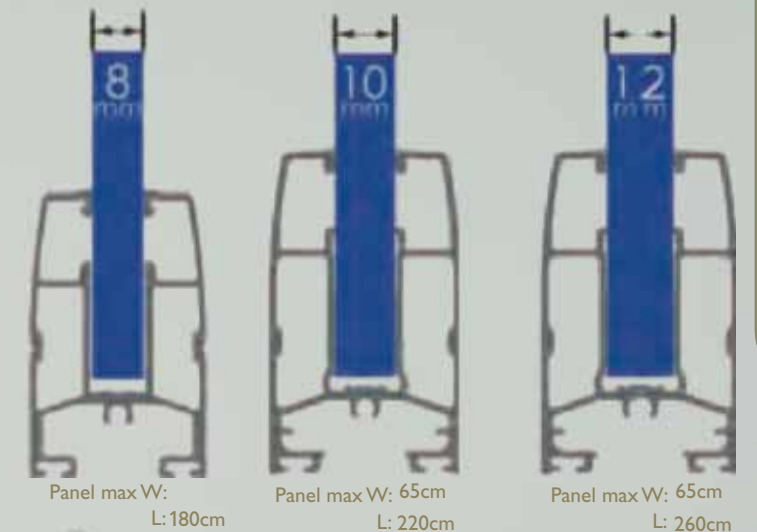

### Magic Handle

new way to enjoy opening your glass curtain with KGA by using the magic handle that facilitate the opening of the shutter in a modern and easy way.

### Two Types Of Glass Thicknesses

Based on the characteristics of the place the system will be applied, three types of glass thicknesses can be used. Either 8mm, 10mm, or 12mm. The choice of the glass thickness depends on the level of isolation or the characteristics of the application place.

### Easy cleaning inside & outside

Based on its special designed side, panels the system allows inside-outside cleaning of the windows as all panels can be located separately when desired.
